

Inaugural SGBC Green Building Conference WorldGBC International Congress 2010

13 – 16 September 2010

Sands Expo Convention and Exhibition Centre
Marina Bay Sands, Singapore

Sustainable and Affordable Solutions for the Built Environment

In line with the mission of the Singapore Green Building Council (SGBC) to propel Singapore's building and construction industry towards environmental sustainability, SGBC is pleased to present the inaugural **SGBC Green Building Conference 2010** to be held from 13 – 14 September 2010 at Marina Bay Sands, Singapore.

SGBC is also honored to achieve the Established Member status with the World Green Building Council (World GBC) and also winning the hosting rights to the **WorldGBC International Congress 2010** which is held from 13 – 14 September 2010 alongside the inaugural SGBC Green Building Conference.

As part of the key event, the "Leadership in Green Building Lecture Series 6" will feature leading green building experts from around the world to discuss topics and ideas that will help to harness business opportunities from the green movement.

SGBC in strategic partnership with Reed Exhibitions, will also welcome **Build Eco Xpo Asia (BEX Asia) 2010** held in conjunction within the same week from 13 – 15 September 2010 – providing a dedicated trade event that has a strategic focus on the Built Green environment featuring eco-friendly, energy efficiency building materials, design and architecture – reaching out to Green building suppliers, industry practitioners and professionals.

DAY 1

MONDAY 13 SEPTEMBER 2010

08:00 - 09:00 REGISTRATION

WorldGBC International Congress 2010 - Inaugural SGBC Green Building Conference - BEX Asia Exhibition
Joint Opening Ceremony

09:00 - 09:15 OPENING REMARK
Mr. Paul Beh, President, Asia Pacific, **Reed Exhibitions**

09:15 - 09:30 SPEECH BY
Er Lee Chuan Seng, President, **SGBC**

09:30 - 09:45 SPEECH BY
Mr. Tony Arnel, Chairman, **WGBC**

09:45 - 10:05 SPEECH BY
Guest of Honour

10:05 - 10:10 **GOH declares Opening of WorldGBC International Congress 2010/Inaugural SGBC Green Building Conference/BEX Asia Exhibition**

10:10 - 10:30 *TEA BREAK AND TOUR OF EXHIBITION*

WorldGBC International Congress 2010
(Closed Door By Invitation Only)

10:30 - 10:40 WELCOME MESSAGE
Tony Arnel, Chairman, **WGBC**

10:40 - 11:00 **AGM-Annual Progress Report and 2011 Strategies**
Jane Henley, CEO, **WGBC**

11:00 - 12:30 SESSION 1
Effective strategies for market transformation: Looking at how GBCs become and maintain a position as strong as influential market leaders in a crowded market place.
GBCs are set up to drive change that is market driven, yet being aligned with government. De-constructing some of the strategies and tactics that GBCs have used to gain influence and make a real impact in their country. This session will also look at other movements and phenomena we can learn from to be even better at what we do.

12:30 - 14:00 *LUNCH BREAK*

WorldGBC International Congress 2010
(Closed Door By Invitation Only)

14:00 - 15:30 SESSION 2
A World Green Building Campaign: Tackling Global Climate Change, meeting local priorities.
To give GBCs the background and resources to work with their own governments to put buildings firmly on the agendas as a key carbon reduction strategy. Together we must demonstrate that the potential of the built environment to deliver is unrivalled global carbon emission reductions cost effectively while simultaneously meeting a wide range of socio-economic local priorities from affordable housing energy security, economic stimulus and job creation. The Policy Task Force has created a campaign with resources and recommended activity for you to take home and action as part of our global strategy.

15:30 - 16:00 *TEA BREAK*

16:00 - 17:15 SESSION 3
Rating Tools and Common Carbon Metric
To discuss the trends in rating tools by comparing and contrasting global activity there will be two themes in this session. One will focus on approaches to benchmarking and measuring and capturing performance data from buildings, and how the common carbon metric work will be integrated into performance based tools. It will also explain the scope of common carbon metric work and how this will be important for governments and cities as buildings become a more important part of the solution to country carbon emission reductions. Secondly this session will also look at the relationship between voluntary tools and regulatory tools and the impact of other standard setting bodies such as ISO to discuss the possible future scenarios and to role of GBC's in this space as markets mature. This session will include our partners, Sustainable Building Alliance, UNEP-SBCI

17:15 - 17:30 PANEL DISCUSSION

18:30 - 20:30 NETWORKING RECEPTION
WorldGBC International Congress 2010/Inaugural SGBC Green Building Conference Delegates and BEX Asia Exhibitors

** terms & conditions apply*

Leadership in Green Building Lecture Series 6

Holistic Sustainability is a multifaceted concept embracing affordability, marketing, resource efficiency, energy efficiency, durability, comfort and health. The adoption of a holistic sustainable approach can help building and construction stakeholders to achieve greater sustainability through cost effective solutions in design, construction and operation. The Leadership in Green Building Lecture Series 06 provides professionals with a unique opportunity to understand the design strategies, techniques, technologies, construction methods and material innovations in green building.

14:00 - 15:00 David Johnson, Director
William McDonough

15:00 - 16:00 Bill Odell, Director,
**Science and Technology Group,
The HOK Group**

16:00 - 16:30 *TEA BREAK*

16:30 - 17:30 To be advised

Conference and WorldGBC International

DAY 2

TUESDAY 14 SEPTEMBER 2010

WorldGBC International Congress 2010 (Opening Session)

08:30 - 08:40

WELCOME ADDRESS
Lee Chuan Seng, President, **SGBC**

08:40 - 08:50

OPENING ADDRESS
Tony Arnel, Chairman, **WGBC**

08:50 - 09:00

KEYNOTE ADDRESS
China: Vice Minister Qiu BaoXing for Ministry of Construction, PRC

SESSION 1

Affordable and Sustainable Solutions

Green Buildings should no longer be synonymous with only high-end technology driven solutions. This session will look at how different countries are delivering large-scale Green Building solutions that meet their versions and still fit their budgets.

09:00 - 09:30

PAPER 1: **South America: Emphasis on affordable and sustainable green solutions**

09:30 - 09:50

PAPER 2: **South Africa: Introducing the socio-economic layer to sustainable building solutions**

09:50 - 10:10

PAPER 3: **Australia: Affordable housing provision issues as key to achieving sustainable cities**

10:10 - 10:30

PAPER 4: **Singapore: Affordable Eco-housing: Punggol Eco-Town**

10:30 - 11:00

TEA BREAK

SESSION 2

Policies Paradise

Governments play an important role in stimulating a market place and connecting building control legislation, incentives to accelerate green building practices. This session will focus on policies and initiatives that have been used to accelerate the pace of green building driven by co-benefits of combat climate change. This session will assist governments in the formulation of appropriate policies, or enable GBCs to advise their governments on global best practice. A panel of government officials are invited.

11:00 - 12:30

Senior government officials from Asia

12:30 - 14:00

LUNCH BREAK

SESSION 3

Innovations in Financing Green Solutions

The increased capital investment often needed to complete a deep retrofit or build a new green building is viewed as a barrier to many developers. This session will investigate innovative financial approaches to remove this barrier.

14:00 - 14:20

PAPER 1: **Why Green Buildings are Key to Asia's Future**

14:20 - 14:40

PAPER 2: **Approaches to Financing of Energy Efficient and Green Buildings (Germany - TBC)**

14:40 - 15:00

PAPER 3: **Innovative Carbon Trading in Japan**

15:00 - 15:30

PAPER 4: **Government Enhanced Financing Schemes (USA-TBC)**

15:30 - 16:00

TEA BREAK

SESSION 4

World Events and how they share Green Solutions and Green Building Trends in a city and country.

16:00 - 16:30

CASE STUDY 1: **The Vancouver Olympic 2010 – Canada GBC**

16:30 - 17:00

CASE STUDY 2: **The Shanghai World Expo 2010 – China GBC**

17:00 - 17:30

CASE STUDY 3: **The London Olympic 2012 – UKGBC**

19:00 - 21:00

SGBC 1ST ANNIVERSARY DINNER

al Congress 2010

DAY 3

WEDNESDAY 15 SEPTEMBER 2010

Zero Energy Buildings & Cutting Edge Green Building Technologies and Designs

09:00 - 09:45

KEYNOTE SPEECH 1: **Singapore Zero Energy Building**
Ang Kian Seng, DRD/BCA and Prof Lee Siew Eang, NUS

09:45 - 10:30

KEYNOTE SPEECH 2: **Smart Energy Technologies in Japan**
Mitsuru Homma, Sanyo

10:30 - 11:00

TEA BREAK

TRACK 1: Super Energy Efficient Buildings

TRACK 2: Cutting Edge Green Buildings Technologies and Designs

TRACK 3: Valuating & Financing Green Buildings

11:00 - 11:30

Tenaga Diamond Zero Energy Office
Gregers Reimann
IEN Consultants (TBC)

Applications of Insulated Concrete Form, BASF
Paul Menezes
BASF

Returns on Sustainable Investment
Sarah Daly, MD
Heath Avery Architects

11:30 - 12:00

The Breathing Building
Ye Qing, Director
Shenzhen Institute of Building Research

Energy Efficiency Project Financing
Romeo Carlos, Head/Advisory Services & Sustainability Programme
IFC (TBC)

12:00 - 12:30

Zero Energy Office Building: The Pearl River Tower

How to improve your buildings energy efficiency with Vertical Transportation
Johannes De Jong, Director/Technology
Kone Elevators

Achieving Grid Parity through Solar System Leasing
Frank Phuan
Sunseap

12:30 - 14:00

LUNCH BREAK

Case Studies on Green Buildings and Sustainable Construction

14:00 - 14:45

KEYNOTE SPEECH 1: **Khoo Teck Puat Hospital**
Liat Teng Lit, CEO/KTPH and Prof Lee Siew Eang, NUS (TBC)

14:45 - 15:30

KEYNOTE SPEECH 2: **Holcim International Union for Conservative of Nature**
Dr Marc Angelil, Dean of Architecture, Swiss Federal Institute of Technology

15:30 - 16:00

TEA BREAK

TRACK 4: Green Mark Platinum Award Building Showcase

TRACK 5: Green and Sustainable Construction

TRACK 6: Retrofitting Existing Buildings

16:00 - 16:25

Beh Lean Hooi, Assistant Vice President
Ascendas Service

Note: * This paper will talk about BCA Sustainable Construction Capability Development Fund, Green & Gracious Builder Awards, Construction Material Recycling, and how Sustainable Construction is incorporated into the Green Mark Scheme - a first in green building rating system.

The above programmes and speakers may be subjected to changes.

Inaugural SGBC Green Building Conference WorldGBC International Congress 2010

DAY 4

THURSDAY 16 SEPTEMBER 2010

SINGAPORE ECO TOUR SITES

A tour of exemplary projects awarded under the BCA Green Mark scheme will form part of the conference programme to showcase sustainable development in the tropics. Participants will get to experience green buildings in operation.

SOME OF THE SITES INCLUDE:

313@Somerset

Created through Lend Lease's integrated property skills involving its three business streams of Bovis Lend Lease, Lend Lease Retail and Lend Lease Investment Management, 313@Somerset is a project that aims to develop the most sustainable shopping centre in the Asian region.

313@Somerset aims to not only reduce operating expenses by mitigating exposure to future rises in energy costs, but to also introduce community engagement programmes that take the characteristics of the local cultural, historical and natural environment into account. This project also aims to reduce the carbon footprint, reduce water usage and establish estate recycling as part of the development.

KTP Hospital

The new home of Alexandra Hospital—Khoo Teck Puat Hospital @ Yishun (KTPH@Yishun) is a 550 bed hospital procured through international design competition by the Ministry of Health, and managed by the management team of Alexandra Hospital. To be commissioned in the first quarter of 2010, KTPH@Yishun is designed to support the hospital's Mission to "Improve Health and Reduce Illness through Patient-Centered Quality Healthcare that is accessible and seamless, comprehensive, appropriate and cost-effective, in an environment of continuous learning and relevant research."

Zero Energy Building

BCA's Zero Energy Building (ZEB) @ BCA Academy is BCA's flagship R&D project to showcase various advanced green building technologies, with emphasis on energy efficiency.

The first of its kind in Singapore, ZEB will be grid-connected but will be net zero, i.e. not drawing energy from the grid over a 12 months period. The 3,000-sq metre building is expected to be 60 percent more energy efficient than conventional buildings, and to be fully powered by solar energy.

Tampines Concourse

A three-storey contemporary office building in the heart of Tampines Regional Centre, 11 Tampines Concourse boasts of many firsts in terms of sustainable construction and design features. The project was envisioned to be a uniquely simplified and cost-effective development aimed to provide a healthy, customer and community friendly working environment.

The development is situated near the bus interchange and Tampines MRT Station easily connects to the rest of Singapore via the ECP, PIE and TPE. It is also surrounded by abundant amenities such as shopping malls, a sports stadium, regional library, post office and community centre.

Samwoh Eco Building

Partially funded by the MND Research grant, the objective of this project is to conduct a full scale study on the use of Recycled Concrete Aggregates (RCA) in structural concrete for building structures. It involves determining the optimal design of concrete mix with RCA for constructing an actual three-storey building. Extensive instrumentation is carried out on the building to monitor the structural performance of the RCA material. The building is the first in Singapore and one of the few in the world to be constructed using concrete with high dosage of RCA.

Tampines Grande

Designed as a cutting-edge, new generation Green office with environmental sustainability in mind, 7 & 9 Tampines Grande boasts the largest use of solar photovoltaic and solar thermal panels in a commercial property in Singapore, measuring some 2,080 square metres installed on its roofs and facade. It is also the first to incorporate a solar air-conditioning system here. Collectively, the development's green features will contribute to an estimated energy savings for the entire building amounting to 2.7 million kWh per year and a reduction in CO2 emission by approximately 1,4000 tonnes per year. In all, CDL invested approximately 4 percent of the total construction cost into the development of the building's numerous green features.

ABOUT

content that enhances your competitive advantage and knowledge of the **BUILD GREEN** sector. The event brings together industry practitioners, professionals and key buyers across the regions to learn, network and do business with Southeast Asia's developing economies."

"BEX Asia is your priority business event for Southeast Asia's building market. The exhibition is focused on **BUILD GREEN** featuring eco-friendly, energy efficiency building materials, design and architecture for the future of sustainable environments and incorporates critical

ABOUT SINGAPORE GREEN BUILDING COUNCIL

The mission of SGBC is to propel the Singapore building and construction industry towards environmental sustainability by promoting green building design, practices, technologies and products, the integration of green building initiatives into mainstream design, construction and operation of buildings as well as building capability and professionalism to support wider adoption of green building development and practices in Singapore.

Its work will complement and support the government's efforts to accelerate the greening of our buildings by 2030. At the same time we will share our knowledge with other countries in our climatic zone.

In March 2010, we received the Established Member status from the World Green Building Council, launched Singapore's premier Green Building Product Listing Website and successfully held our first Annual General Meeting. To-date, we have around 200 members comprising of strong green building advocates from developers, architects, engineers, contractors, manufacturers and suppliers, public agencies, tertiary institutions and NGOs. There are local and overseas events organized whole year round for our members to network, to share and to learn.

ABOUT WORLD GREEN BUILDING COUNCIL

WORLD GREEN BUILDING COUNCIL

In 2002 eight nations formed the World Green Building Council (WorldGBC), a union of national councils whose mission is to accelerate the transformation of the built environment towards sustainability. The WorldGBC is rapidly building an international coalition that represents the entire global construction industry. Collectively, these nations represent 50% of global construction activity, and their councils touch more than ten thousand companies and organizations.

The WorldGBC provides an international forum, and champions proven tools that significantly accelerate market transformation from traditional, inefficient building practices to new generation high-performance buildings, provide "branding", and transform the skills and knowledge of the industry as a whole. This is a critical response strategy for cities and countries worldwide to their national and international commitments to reduce carbon emissions and redress other environmental impacts. Green Building Councils are highly effective at engaging leaders across sectors to transform the built environment. It's proven, replicable and it's building momentum.

We are a business-led coalition. Green Building Councils are consensus-based not-for profit organizations with no private ownership, and diverse and integrated representation from all sectors of the property industry. They see business as a powerful solution provider, and are working to improve frameworks that harness the ability of business to deliver.

We work in many ways to support our members and to accelerate the development of emerging councils and rating systems. We provide organizational tools, advocacy, facilitation, information, a non-partisan forum, and other valuable resources that help people take highly effective action locally.

We support our members' efforts to adopt, implement, and refine market-based transformation tools that meet local needs. At the same time we provide leadership and a global forum that supports the effort to provide standardized global information on building performance.

An all NEW venue

@ Sands Expo and Convention Centre, Marina Bay Sands

Business visitors will also enjoy the extensive Meetings, Incentives, Conventions and Exhibitions (MICE) facilities featuring state-of-the-art technology, highly flexible exhibition halls, and a convention centre that can host over 45,000 delegates. Marina Bay Sands seamlessly combines business and leisure into a singular destination unlike any other.

Leadership in Green Building Lecture Series 06

HOLISTIC SUSTAINABILITY

design • construct • operate

Holistic Sustainability is a multifaceted concept embracing affordability, marketing, resource efficiency, energy efficiency, durability, comfort and health. The adoption of a holistic sustainable approach can help building and construction stakeholders to achieve greater sustainability through cost effective solutions in design, construction and operation. The Leadership in Green Building Lecture Series 06 provides professionals with a unique opportunity to understand the design strategies, techniques, technologies, construction methods and material innovations in green building.

• keynote speakers •

David Johnson

*West Coast Director, San Francisco,
William McDonough + Partners*

As the founding member of the William McDonough + Partners San Francisco studio, David Johnson provides design leadership on all projects. He thrives on adapting the "Cradle to Cradle" design principles to building projects in the pursuit of place-specific, high-performance designs. This collaborative design approach begins with a detailed analysis of each site, program and community, identification of the economic, environmental and social forces that will give form to the design solution.

Bill Odell

*Director, Science and Technology Group,
The HOK Group*

As a Senior Vice President and a member of the HOK's Board of Directors, Bill Odell heads the science and technology group as well as HOK's Sustainable Design projects and efforts. He is a sustainable design specialist, having several LEED accredited buildings to his name after the programme's inception in 1998. He was also one of the founding members of the US Green Building Council in 1993.

• **S\$250** per participant •

For more information, please log on to www.sgbc-conference.com.sg

The Leadership in Green Building Lecture Series provides a platform for practitioners to gain insights from international award winning projects and the adoption of innovative green designs. Leading green building designers and experts will be invited to share their thoughts, visions and aspirations with the building industry of Singapore.

Cancellation & Substitution Policy

Notice of withdrawal must be given in writing at least 14 working days before the closing date for registration. Failure to do so will result in your organisation being billed for the registration despite "non attendance". No refund of fees will be made for cancellations on or after 30 August 2010 or "non attendance" participants. Substitutions are acceptable in writing to the organiser. However, non members substituting for members must pay the difference in fees prior to the Conference.

If, in the sole discretion of the Organiser, the Conference premises shall become unfit for occupancy or if the holding of the Conference or the performance of the Organiser of any of the provisions of the event is interfered with by virtue of any cause or the Conference may or could in any way be affected by a cause not within the control of the Organiser, this Conference (or any part thereof), may forthwith be terminated or cancelled or postponed or otherwise rearranged by the Organiser at its sole option, without the Organiser or the Manager being liable in damages or otherwise to the Participant. Upon the termination or cancellation as aforesaid, the Organiser shall not be liable to the Participant and no refund will be made upon any postponement or rearrangement as aforesaid, including in the event the Participant deciding not to participate in the Conference. The Organiser may retain all amounts then paid by the Participant.

Confirmation Details

Entry to the Conference is subjected to FULL PAYMENT being received before the commencement of the Conference. It is therefore important to ensure that payment reaches the Organiser at least 14 working days before commencement. Outstanding payment may be made at the Conference registration counters in CASH or by CREDIT CARD only. Delegate Administration Letters will be provided to each registered delegate at least two weeks before the commencement of the Conference. The letter will provide details of delegate administration at the venue. Registered delegates who do not receive the letter one week before the Conference, please contact the Organiser.
